PROJECTS:

Village Commons:

In continued collaboration with the **Cortes Island Community Foundation** the SCCA is excited to integrate intentional design into our summer market layout and outdoor spaces. Phase I of the Village Commons development is underway with the construction of an office building, the creation of the Green Square space behind the Cortes Radio building which includes a shift of the outdoor market from the parking lot and into a pedestrian-focused layout, a new location for the FOCI office, and more developments planned for this summer.

Mansons Hall Deck and Fire Mitigation:

The final touches are being applied to our beautiful new deck by local artist Arne Olafson and team. A huge thank you to the building team of Richard Andrews, and the crew at Awesome Welding. We will soon be rounding off our project with a new fence for the playschool yard, in time for summer outdoor fun. Deep thanks to our sponsors the Cortes Housing Society and the Strathcona Regional District Fire Smart program.
